

# ATOMIC CMS

the learning object

**repository**

*of your wildest dreams*

## The CMS for your LMS.

One tool to search, preview and insert content into course modules and pages all in a single, easy to use location inside your LMS.

Share your courses, modules and assets (*and your expertise*) with others in your LMS, in other learning management systems, as content packages, ebooks, or websites.

### **C**ost

Reduce the cost of developing and maintaining courseware by sharing your resources.

Plus, ensure compliance with licensing requirements by attributing content to its original source indexed with Atomic CMS.

### **M**anage

Add items to Atomic CMS indexes by sharing LMS courses and modules, calling APIs, bookmarking pages, harvesting RSS, OAI, and other feeds, and connecting to services including video management servers and content provider's systems.

### **S**hare

Use openly shared content to teach for results while modifying the content to best support the learning styles and needs of your students.

Easily share your lessons, ideas, or other curated content with a single click.

## Keep it Simple.

Atomic Jolt develops powerful solutions that make teaching and learning more enjoyable and effective. Simple solutions for complex problems—and so easy to use you'll wonder how you've lived without them.

## Our Services.

Our products and professional services include Apps for Canvas, LMS hosting, and custom development work for Universities and EdTech companies of all sizes.
